# Peringkat Segmentasi IoT

1. Based on 1,600 publicly known enterprise IoT projects (Not including consumer IoT projects e.g., Wearables, Smart Home). 2. Trend based on comparison with % of projects in the 2016 IoT Analytics Enterprise IoT Projects List. A downward arrow means the relative share of all projects has declined, not the overall number of projects 3. Not including Consumer Smart Home Solutions. # Vendor IoT

Source: IoT Analytics, January 2019. Vendor map does not include suppliers of vertical or use case specific solutions (i.e. end-to-end vibration monitoring solutions, etc.). Leading companies were selected based on a number of factors including sophistication of relevant product offerings, number of compelling case studies, and size of Industry 4.0 business. It is possible that some vendors have been missed. To submit a company for consideration in the 2020 vendor map, please contact [research@i-ot-analytics.com](mailto:research@i-ot-analytics.com) with the company information.

The background is a vibrant purple-to-pink gradient. It features several abstract geometric elements: a cluster of overlapping orange and purple triangles on the left; a small orange circle and a blue circle near the top center; a small blue and purple rectangle on the top right; a complex arrangement of orange and purple triangles with intersecting blue and orange lines on the right; a series of white dots in a grid pattern at the bottom left; and a series of white dots in a vertical line on the right. A horizontal white line is positioned below the main text.
